UTM Weekly Co-Curriculum Day

Dr. Hau Yuan Yen, the academic advisor, with SKBSK students

Co-curricular activities are designed with the intention to further develop balanced human resources in physical, emotional, spiritual, and intellectual aspects. It is believed that by attending co-curricular activities, students' generic skills can be developed. Therefore, it is only appropriate that co-curriculum is integrated in the education system in Malaysia. Through this integration, students will be facilitated towards being well-rounded and multi-skilled individuals with better social skills, self-esteem, sense of responsibility, and self-confidence.

Academic advisor and students from Faculty of Engineering participating in Co-Curriculum Day

February 18 – During the semester, all students in UTM are required to participate in Co-Curriculum Day every Tuesday starting from February 2020. One of the activities lined up for students of Faculty of Engineering on Co-Curriculum Day is meeting sessions with their academic advisors.

SKBSK students and their academic advisor in a meeting during Co-Curriculum Day.

School of Electrical Engineering (SKE) students attended their first activity - a talk on "Shifting Habits Towards Sustainable Campus Lifestyle"

100 SKE students attended the Sustainable Talk
