## Student Development Webinar Series

**June 25** – Dr. Muhammad Hanif Bin Ramlee from School of Biomedical Engineering & Health Sciences (SKBSK) organized a webinar titled “Temuduga Kerja Pasca Covid-19, Apa Anda Perlu Tahu?” on 25 June 2020. He invited Mr. Norasmadi Bin Mat Nor the Human Resources and Administrative Manager from PD Kawamura Kako Manufacturing Sdn. Bhd., Selangor, to share with the students some advice on how to be well-prepared for an interview especially during this Covid-19 pandemic. Three students from SKBSK also joined the webinar for mock-interview session.

## School of Electrical Engineering Student Trains with the Perdana Fellows Program

Oscar Ling Fang Jack, a student from School of Electrical Engineering, has been selected to attend the Perdana Fellows 2020, a program spearheaded by the Ministry of Youth and Sports. This program presents Malaysian youths the once-in-a-lifetime opportunity to be personally engaged at the highest levels of the federal government and contribute to the nation-building. The selected youths will work as interns or temporary assistants to members of the Cabinet including the Prime Minister.

*The Perdana Fellows 2020* exposes the selected students to various aspects of government leadership with the supervision from a minister who will be their mentor. Candidates for this program must have a strong academic record and active in extracurricular activities. Congratulations Oscar for this golden opportunity!

# School of Computing: Webinar Series Continued

The third webinar series by SC

The fourth webinar series by SC

In June 2020, School of Computing conducted another two webinar series titled “What to Expect from E-Assessment?” and “Pursue Your Master/PhD at School of Computing UTM”. Both webinar series involved the participation from School of Computing students as the moderator and panelists.

Since movement control orders are being extended into different cycles, these webinar series conducted by School of Computing since May 2020 are great alternatives to face-to-face learning sessions. Such sessions should be continued since both students and lecturers can still share with and learn from each other without having to be on campus.

# School of Computing won 3<sup>rd</sup> place in SEMS 3.0

SC was placed third in the SEMS 3.0 program

UTMXCITE Sustainable Entrepreneurial Mindset Showcase 2020 (SEMS 3.0) is UTMXcite flagship program that aims to democratize and nurture the spirit of technopreneurship among UTM students in developing their ideas to solve challenges pertaining to Sustainable Development Goals (SDGs). SEMS 3.0 is tailored exclusively for entrepreneurship students. Due to Movement Control Order (MCO), SEMS 3.0 is entirely conducted via online. After series of judging and reviewing, the team from School of Computing (SC) won the third place in the competition. Congratulations!
